

HERE IN VERMONT: State Plan for *Ending the HIV Epidemic*

GOAL: Increase Knowledge of HIV Status

STRATEGY

ACTIVITIES

INDICATORS

Strategy 1: Diagnose people with HIV as early as possible (*DOMAIN: Diagnose*)

Activity 1:

Increase the total number (#) of MSM tested for HIV

- A1.1. Total # of individuals tested
- A1.2. Total # of MSM tested
- A1.3. Total # of MSM tested with reactive HIV results

Strategy 2: Treat people with HIV rapidly and effectively to reach sustained viral suppression (*DOMAIN: Treat*)

Activity 2:

Increase the percent (%) of HIV viral load suppression among PLWH

- A2.1. Total # of PLWH served through medical case management
- A2.2. Total # of individuals prescribed ARV
- A2.3. Total # & % of active patients with suppressed viral load

Strategy 3: Prevent new HIV transmissions using proven interventions, including pre-exposure prophylaxis (PrEP) and syringe services programs (SSPs) (*DOMAIN: Prevent*)

Activity 3:

Increase number (#) of MSM on PrEP

- A3.1. Total # & % of MSM receiving Risk Assessment score warranting PrEP referral
- A3.2. Total # & % of MSM offered referral to PrEP services, accepted referral
- A3.3. Total # & % of MSM accepting referral to PrEP, linked to medical setting for PrEP care

Activity 4:

Increase access to Syringe Services Programs

- A4.1. Total # of hours SSP's operating per week/month
- A4.2. Total # of unduplicated individuals served with SSP across all sites
- A4.3. Total # of unique clients served through SSP, new to SSP

Activity 5:

Decrease risk among PLWH at risk for HIV Transmission

- A5.1. Total # of PLWH served with Non-Medical Case Management
- A5.2. Total # served with NMCM, with documented conversation regarding barriers to care
- A5.3. Total # & % of PLWH stably housed

Strategy 4: Respond quickly to potential HIV Outbreaks to get vital prevention and treatment services to people who need them (*DOMAIN: Respond*)

Activity 6:

Increase participation in HIV partner services among persons diagnosed with HIV infection

- A6.1. Total # of individuals with HIV reactive results referred to VDH for partner services
- A6.2. Total # of individuals in case management referred to partner services
- A6.3. Total # of individuals that followed up with partner services

Activity 7:

Ensure that all individuals engaging in HIV Medical Care in Vermont have genomic sequence testing completed

- A7.1. Total # of individuals new to care that had HIV genomic sequence testing completed
- A7.2. Total # of VDH cluster interviews conducted where linkages were not yet known
